

# BK4 Red and Blue Warning Throwing Device

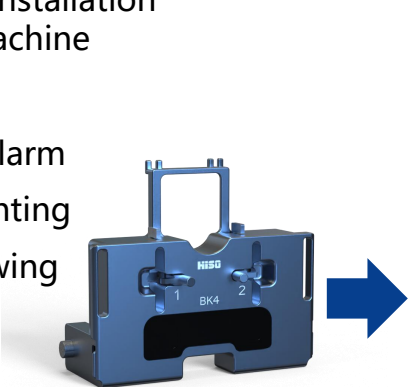

## Product Introduction

BK4 is a two in one device with red and blue flashing lights and a thrower. It can work reliably in harsh weather conditions and can be mounted on DJI Matrice 4 series unmanned aerial vehicles through the DJI EPORT interface. It has the ability to quickly install in 5 seconds at the bottom and has a two-stage throwing function that can throw two mounted objects separately. At the same time, each throwing point can achieve two throwing modes: strapping style throwing and hanging line throwing.

## Product Advantage

- Control link PSDK
- Non destructive installation of the original machine
- Plug and play
- Abnormal state alarm
- Non-power mounting
- Non-power throwing

## Technical Parameters

Size	≤85×75×35 mm
Weight	≤75g
Supply voltage	DC 9-17V
Total power	≤25W
Throwing channel	2
Operating temperature	-20℃ to +50℃
IP grade	IP55
Control mode	PSDK control/WeChat mini program, APP Bluetooth control
Lighting parameters	120 ° angle, red and blue flashing lights 2 channels; Ensure that the drone can be seen 360 degrees around it while hovering normally; Red and blue lights, no blind spots observed under ground red and blue lights

## Applicable Model

DJI 4E/4T
